Looking for a maternity care provider?

Here's why a family physician may be the right choice for you.

Family doctors bring unique skills that combine a medical and holistic approach to maternity care. We get to know you and your family over time so that we can provide care you can trust.

As family doctors, we recognize birth as a natural event and are passionate about delivering excellent care that values women's choices.

We offer quality medical care focused on low-risk births. We provide you with the information and guidance you need to make the best decisions for you and your baby.

Family doctors offer care throughout your pregnancy and beyond including newborn care, breastfeeding support and general medicine and counselling.

We will be with you every step of the way.
