Sherbourne Health is a community-based health facility providing innovative primary health care to all the diverse populations of southeast Toronto. Our services have a special focus on people who are underhoused, the 2SLGBTQ community, and newcomers to Canada.

We are currently seeking a locum physician to join our Newcomer Health Team. This would be a 6-month term with the potential to become a permanent member of the physician’s group if both parties feel it is a good fit. The position is 3-4 days per week, starting in January 2024. The hours are regularly 9am-5pm with 1 evening clinic every 2-3 weeks and Saturday morning clinics once every 2-3 months.

The physician will work with a dynamic clinical team to provide primary care to newcomer clients and people living in the surrounding community who are part of our other priority populations. Sherbourne’s medical services are delivered in a Family Health Team model, with physicians under an Alternate Payment Plan with a guaranteed competitive hourly rate of $242.79/hr. Benefits include a well-supported interdisciplinary team (nurses, nurse practitioners, mental health counselors, dieticians, client resource workers, lab technicians, diabetes education team, onsite pharmacy), well equipped offices, full EMR (Accuro), EMR/IT support, UptoDate access, HRM, EMR integrated eConsult, Ocean e-referral, and OLIS. Coverage for time off is provided by the group through shared care and regular locum availability. Teaching opportunities are available as the clinic regularly hosts learners as a University of Toronto teaching site. Sherbourne Health was accredited with exemplary standing in 2023 by Accreditation Canada and in 2017 won the OCFP’s Family Practice of the Year.

The successful candidate will work collaboratively within an interdisciplinary care model, under an anti-oppression framework. Candidates must be motivated and comfortable working with highly complex clients. Experience with Newcomer health, 2SLGBTQ health including transgender care, HIV primary care, mental health, substance use disorders and an appreciation for the social determinants of health is beneficial. Training in transgender care through Rainbow Health Ontario is offered as part of our onboarding.

Candidates who reflect the diversity of our Toronto community are particularly encouraged to apply. This includes diversity in languages spoken, culture, race, sexual orientation and gender identity.

Please send your CV to: Sarah Follett, MD CCFP
