

Part-Time/Full-Time FHO Physician Opportunity

Toronto, Ontario, Canada - Grace Health Centre

Are you interested in being a part of a team that values holistic patient healing, preventative care, and genuine, impactful mentorships?

Want to make a significant difference in supporting the local community of Downsview that has lower socioeconomic and accessibility levels? We have a diverse patient population; ability to speak Italian, Spanish, Chinese or other languages is an asset to support new immigrants and multicultural diversity.

This is an excellent opportunity to explore a new working environment and care for a diverse, high need patient population. Supervision and/or mentoring available from experienced physicians. Extensive administrative support and staff to handle pre and post visit patient care (i.e. taking vitals, preventative care and education).

We are seeking new graduates and/or established family physicians who are interested in joining the North Downsview FHO Network under Grace Health Centre. Waitlist of patients waiting for physicians to roster.

Practice Model

FHO Model: The physician income will be based on fee-for-service billings to the Ontario Health Insurance Plan (OHIP) and other reciprocal insurers. An average annual gross income \$250,000 to \$400,000 depending on roster size. Competitive overhead for long term commitments. Very attractive negotiable split. All Doctors are responsible for their registration fees to CPSO, CMPA and OMA. Income stabilization (for new graduates/entrants). Older demographic patients awaiting for new physicians in the neighborhood.

Flexible Hours - Create your own schedule. Flexible Work Styles: enabled for virtual appointments.

Calls will be one weekday evening 5pm-8pm and 1 3 hour shift ½ Sat.

Supportive Co-workers: Our dedicated and seasoned physicians have heart to support new and recent graduates from Canadian, UK, US, Ireland and Australia Medical Schools and offer supervision for International Medical Graduate (IMG) Physicians can be arranged. Interested IMG Physicians must have completed at least the Medical Council of Canada Evaluating Examination (MCCE). Candidate must already have eligibility with CPSO. It is important to like the people that you work with on a daily basis.

Worry-Free Administration: We have well-trained staff members who prepare every in-person patient by conducting (if needed) telephone COVID screening, temperature checks, infection

control sanitization, measurement of patient vital signs, and keeping track of needed preventive interventions allowing you to maximize your time attending to patient care. Billing and management of roster, outside use is supported to optimize your income and work-life balance.

Leveraging Digital Innovation: We use electronic medical records (Oscar) and Ocean for patient messaging, online booking appointments and reminders. With a large patient database, research opportunities are available, if interested.

Spacious, Clean Space: Multiple large, spacious exam rooms with wide windows for sunlight and view for smooth and quick patient visits. Vitals area to support patient preparation, waiting room and lounge area are available.

Easy Commute: Our practice is located in the Downsview area at the junction of Keele St/Hwy 401. It is highly accessible to major highways to North York, Toronto, Vaughan, Woodbridge, Brampton, Markham, and Downtown Toronto. Free parking available. There is a lab, x-ray clinic and pharmacy on-site. Clinic is newly renovated.

Who we are

Grace Health Centre was established in 1986 to serve patients in northwest GTA; with a particular desire to help under-served individuals within its community. We serve our diverse patients with genuine respect and love irrespective of their language, religion, culture and background. Our patient population includes new immigrants, low-income families and vulnerable individuals.

You will be joining a team of congenial, passionate, & missional physicians in either a Family Medicine, Psychotherapy, or blended capacity. 3 of our physicians have focused designation as Physician Psychotherapist. We have 2 in-house psychiatrists and a team of registered psychotherapists/social workers to support the increasing need of mental healthcare.

Holistic Healing

Our vision has always emphasized on caring for our patients' complete well-being, which includes the physical, mental, relational and spiritual needs. We believe that when we also explore the psycho-spiritual needs of a patient - it often brings about deep, permanent healing that spans into both the physical and mental wellness of our patients.

Preventative Care Emphasis

We commit to proactive Preventative Care for our patients by regularly monitoring patient needs to decrease the burden of disease and associated risk factors. Participation in vaccination education, Covid and Influenza vaccination clinics for the community is also a central piece to our dedication for our patients. Extra online and take-home resources are made available to our patients for continual healthcare support.

Future Generation Mentorship

Our practice values the contribution and energy of young, aspiring doctors/psychotherapists/healthcare practitioners. We create volunteer, supervising intern and coop opportunities to learn from our physicians and be a part of the clinic community to serve our patients in meaningful ways. If you are passionate about mentoring and fostering the next generation, this is a vibrant community to be a part of and we invite you to join us.
